

Description	N/A	✓	Notes
1. All building faces:			
a. below-grade foundation walls/footings <i>dotted</i>			
b. line of grade at building face			
2. Differentiation between existing/new for addition/renovation projects			
3. Locations of:			
a. wall details			
b. plan details – only if required to augment/clarify notations on key plan/floor plans/building sections			
4. Cross-referenced to other drawings			
a. ensure all conditions requiring clarification are detailed			
5. Verify that window/door openings match building sections			
6. Openings/penetrations:			
a. doors/windows/grilles/vents/firefighting access panels			
b. dimensions to intermediate mullions for door frames/windows <i>or</i>			
c. reference numbers for each door frame/window type cross-referenced to drawings where large-scale elevations placed			
7. Attachments:			
a. light fixtures/receptacles/siamese connections/signage/downspouts/flagpoles, etc.			
8. Structural grid lines <i>with reference symbols</i>			
9. Locations of interior/hidden levels:			
a. floors			
b. finish floor level/elevation <i>for each floor level</i>			
c. flat roofs behind parapets			
10. Vertical dimensions:			
a. to doors/windows/other important items requiring location			
b. floor to floor or floor to roof when not shown on building sections			
11. Exterior construction materials:			
a. graphically/notations – cross-check that terminology/abbreviations used for materials same as in specifications			
b. masonry control joints			
c. expansion joints			
12. Roof-mounted mechanical equipment which affects appearance of building			
13. Cross-check against engineering drawings
