

| Description | N/A | ✓ | Notes |
|---|-----|---|-------|
| 1. Occupancy classification | | | |
| 2. Building area | | | |
| 3. Number of storeys | | | |
| 4. Number of facing streets – number of streets determined <i>as prescribed</i> | | | |
| 5. Whether building sprinklered/unsprinklered: | | | |
| a. exceptions for roof construction for sprinklered buildings <i>as prescribed</i> : | | | |
| i. fire-resistance rating waived | | | |
| ii. heavy timber roof/supporting structure permitted | | | |
| b. requirements for buildings containing multiple major occupancies based on: | | | |
| i. building area/height of entire building | | | |
| ii. most restricted major occupancy | | | |
| iii. some combinations of occupancies prohibited | | | |
| iv. exception if floor area occupied by a major occupancy less than prescribed % of storey | | | |
| 6. Separations between major occupancies <i>as prescribed</i> when: | | | |
| a. adjacent horizontally | | | |
| b. one entirely above another | | | |
| 7. Basements: | | | |
| a. floor assembly above basement designed as fire separation as prescribed | | | |
| b. basement storage garages: | | | |
| i. sprinklered, except for open-air storeys | | | |
| ii. may be considered as a separate building when: | | | |
| (1) garage sprinklered | | | |
| (2) walls/floor and roof above designed as fire separations | | | |
| (3) wall openings without closures separated from storey above | | | |
| 8. Exterior balconies: | | | |
| a. areas/dimensions <i>as prescribed</i> | | | |
| b. construction same fire-resistance rating <i>as required</i> for occupancy classification of building | | | |
| c. fire protection not required on steel members outside exterior wall | | | |
